Technology Transfer and Innovation

Events in technology transfer and innovation field

Enterprise Europe Network carries out a variety of events to promote their activities to companies and organisations at regional, national or European level. The events provide you the opportunity to meet potential cooperation partners during pre-arranged face-to-face meetings, to present your business or technology offers.

Do you have technology profiles in the fields? Please contact office@ipacv.ro to support you.

March 2013

Euroinvent, European Exhibition of Creativity and Innovation, Iasi, Romania, 9-11 May 2013

The Exhibition promotes the International & Romanian creativity in EU context, by displaying the contributions of consecrated schools of higher education, academic research and also of individual inventors. In this way, at the exhibition are participating researchers and inventors through associations, foundations or institutions specialized on development and creativity. While the economic crisis continues to get worse, creativity & innovation are the key to strengthening EU's development. Creativity & innovation contribute to economic prosperity as well as to social, individual wellbeing.

Research

Horizon 2020 - the programme that will cover all research & innovation funding 2014-2020, Budget: 71 billion

Horizon 2020 will be an integrated programme that will cover all research and innovation funding currently provided through the Framework Programme for Research and Technological Development, the Competitiveness and Innovation Framework Programme (CIP) and the European Institute of Innovation and Technology (EIT). The different types of funding provided by the existing programmes will be brought together into a single coherent, flexible framework. It will provide funding for every stage of the innovation process from basic research to market uptake.

Horizon 2020 is the financial instrument implementing the Innovation Union.

EU funding for research & innovation will be focused on 3 key objectives (Excellent science, Competitive industries, Better Society) implemented through specific programs, dedicated financial contribution to the EIT. The primary aim of Horizon 2020 is to strengthen the EU's position as a world leader in science, to help make EU a more attractive location to invest in research & innovation, to bring excellent research results to market which will deliver direct benefits to citizens, affordable health-care, protection against cyber crime, the transition to a resource-efficient, low-carbon economy.

More... [Commission Proposal on Horizon 2020](#), [Council meeting on the rules of participation in Horizon 2020 \(press release\)](#), [Presentation on H2020](#), http://ec.europa.eu/research/horizon2020/index_en.cfm

Academia Journal of Biotechnology welcomes the submission of manuscripts

The journal welcomes the submission of manuscripts that meet the general criteria of significance/scientific excellence, will publish: •Original articles in basic/applied research •Case studies •Critical reviews, surveys, opinions, commentaries.

We invite you to submit your manuscript(s) to biotech.academia@gmail.com or biotech@academiapublishing.org for publication. Our objective is to inform authors of the decision on their manuscript(s) within four weeks of submission. Following acceptance, a paper will normally be published in the next issue.

As reference, our latest issue is made available at <http://academiapublishing.org/ajb/content/2013/Feb/Feb.htm>

Instruction for authors, other details are available at; <http://www.academiapublishing.org/ajb/instructions.htm>

The ACADEMIA JOURNAL OF BIOTECHNOLOGY, an Open Access Journal, is seeking for qualified reviewers as members of her editorial board. We ask you to support this initiative by joining our reviewer's team.

Innovation and Entrepreneurship

Community innovation survey: product, process, organisational, marketing innovation.: innovation behaviour

This article looks at the state of innovation in the European Union (EU) by presenting data on countries' innovation behaviour. Among the EU Member States, the highest shares of innovative enterprises during the period 2008-2010 were observed in Germany (79.3 % of all enterprises), Luxembourg (68.1 %) and Belgium (60.9 %). More than half of all enterprises (52.9 %) in the EU-27 Member States (excluding Greece) reported innovation activity. The lowest shares were recorded in Bulgaria (27.1 %), Poland (28.1 %) and Latvia (29.9 %).

It seems that in the countries where the shares of innovative enterprises are high, the share of innovative enterprises that combine product/process, organisational/marketing innovation tends to be high too. In Germany, Luxembourg, Belgium, the shares of innovative enterprises are higher, these innovative enterprises tend to report both categories of innovation, 58.7 %, 61.5 %, 55.4 %. The countries with low shares of innovative enterprises seem to have fewer innovative enterprises that develop both types of innovation: in Romania, only 32.3 % of innovative enterprises developed both types of innovation, in Latvia 34.5 %, in Poland 33.3 % and in Bulgaria 29.5 %. Among product and/or process innovative enterprises in the EU-27, 25.5 % was engaged in cooperation regarding their innovation activities.

This cooperation might be with other enterprises within the group, suppliers, commercial labs, universities or public research institutes. The remaining (74.5 %) relied only on internal resources. The highest shares of innovation cooperation were found in Cyprus (62.3 % of all product and/or process innovative enterprises), Austria (51.0 %), Slovenia (44.7 %), Lithuania, Hungary (43.3 % and 43.2 % respectively), and the lowest in Italy (12.1 %), the United Kingdom (13.7 %), Malta (18.5 %), Portugal (19.5 %), Spain (22.3 %) and Bulgaria (22.4 %).

COSME, the programme for the Competitiveness of enterprises & SMEs, 2014-2020, Budget: EUR 2.522 billion

The programme for the Competitiveness of enterprises & SMEs (COSME)'s aim is to strengthen the competitiveness, sustainability of the Union's enterprises, including in the tourism sector, encourage an entrepreneurial culture, promote the creation, growth of SMEs. It largely continues the activities started under the current Competitiveness & Innovation programme (CIP) and also ensures continuity with initiatives and actions already undertaken under the Entrepreneurship and Innovation Programme (EIP), such as the Enterprise Europe Network. **Objectives**

- Improve the framework conditions to make for the competitiveness and sustainability of Union enterprises including in the tourism sector
- Encouraging an entrepreneurial culture and promoting the creation and growth of SMEs.
- Improving access to finance for SMEs in the form of equity and debt
- Improving access to markets inside the Union and globally

Objective No 1: Actions to improve the framework conditions for the competitiveness & sustainability of Union enterprises (384.4 million EUR).

1. Actions to improve and strengthen the competitiveness and sustainability of Union enterprises, particularly SMEs.
2. Actions intended to develop new competitiveness strategies. Such actions may include the following:
 - a) measures to improve the design, implementation and evaluation of policies affecting the competitiveness and sustainability of enterprises, including disaster resilience, and to secure the development of appropriate infrastructures, world class clusters and business networks, framework conditions and development of sustainable products, services and processes;
 - b) measures to encourage cooperation in policy making and exchange of good practices and to address international aspects of competitiveness policies.
 - c) support for SME policy development and cooperation between policy makers, particularly with a view to improving the ease-of-access to programmes and measures for SMEs.
3. Initiatives accelerating the emergence of competitive industries based on cross-sectoral activities in areas characterised by a high proportion of SMEs and with a high contribution to the Union's GDP.

Objective No 2: Actions to promote entrepreneurship (86.8 million EUR)

1. Improving framework conditions affecting the development of entrepreneurship; support a business environment favourable to enterprise development and growth.
2. Particular attention shall be paid to young entrepreneurs, new and potential entrepreneurs and female entrepreneurs, as well as specific target groups.
3. The Commission may support Member States' measures to build-up entrepreneurial education, skills and attitudes, in particular among potential and new entrepreneurs.

Objective No 3: Actions to improve access to finance for SMEs (1.436 billion EUR)

1. Actions which aim to improve access to finance for SMEs in their start-up and growth phases, being complementary to the Member States' use of financial instruments for SMEs at national and regional level.
 - a) The equity facility of the Competitiveness & SME Programme, the Equity Facility for Growth (EFG), shall be implemented as a window of a single EU equity financial instrument supporting EU enterprises' growth & RDI from the early stage to the growth stage, financially supported by the Horizon 2020, this Programme. EFG shall use the same delivery mechanism as the equity facility for RDI to be established under Horizon 2020.
 - b) The Loan Guarantee Facility (LGF) shall be implemented as part of a single EU debt financial instrument for EU enterprises' growth & RDI, using the same delivery mechanism as the SME demand-driven window of the debt facility under Horizon 2020 (RSI II).
2. Develop measures, subject to market demand, to improve cross-border and multi-country financing, thereby assisting SMEs to internationalise their activities in compliance with Union law.

Objective No 4: Actions to improve access to markets (2.443 billion EUR)

1. Support for the Enterprise Europe Network.
2. Actions to improve SMEs access to the Single Market including information provision and awareness-raising.

3. Facilitate SMEs access to markets outside the EU, to strengthening existing support services in those markets. SMEs may receive support through the Programme as regards standards, IPR in priority third countries.
4. Foster international industrial cooperation, including industrial and regulatory dialogues with third countries.

How do you foster innovation?

First, you have to define what it means to your company, in your market. For instance, how much of it should be big versus incremental? Next look around and companies that are doing it well, and don't be too proud or stubborn to copy. Once you've done that, there are some basics:

- 1) Recognize, reward innovation/the behaviors that go with it, don't let the organization get in the way. True story: big, global retailer gets an idea from a janitor, a way to conserve electricity that saves the company over \$10M/year, which they implemented but the janitor got nothing, because management didn't want to incentivize someone so low ranking.
- 2) Organize around innovation, as opposed to trying to fit into the existing silos. This means viewing innovation very holistically, as the complex business process that it is. It will mean, in all likelihood, making some pretty big changes.
- 3) Have the courage to do it, the change will not be easy. It will be very difficult. There will be entrenched opposition to it.

The following factors support innovation:

SURVIVAL: Above all else, believe and preach that the failure to innovate is the biggest risk of all.

MAJOR TRENDS: Overlay major trends and your product to foresee how they will interact.

GOOD TIMING: Develop a conscious strategy suited to current conditions before releasing a product.

DIVERSITY: Demand appropriately diverse teams and input channels.

WORKSPACES: Arrange workspaces so that people and ideas bump up against each other continually and naturally.

CRITICAL THINKING: Use critical thinking to channel innovation toward success.

CULTURE: Establish an idea- and change-friendly culture.

CONNECTIVITY: Build many connections to have many ideas.

RECEPTIVITY: Always assume that ideas for innovation have some intrinsic value until proven otherwise.

GUIDANCE: Give innovators only enough vivid guidance to let them move forward with passion.

REACHING AGREEMENT: Celebrate debate, but drive relentlessly toward consensus.

DECISIVENESS: Commit when your mind and heart are united.

Tempus IV - Partners Search

My organization is currently looking for partners (i.e. Universities) from Bosnia, Serbia, Montenegro, Albania for a project to be submitted under the current Tempus IV call for proposals. The topic of the project is the transfer of innovation from Universities to enterprises in the agricultural field in order to strengthen existing links, create new one with enterprises, promote the creation of new enterprises, spin off, to create a link between the research & the 2020 strategy, also according to the Horizon 2020 priorities.

International Community of Mobility Coordinators for people with interest on transnational learning mobility

We are contacting those who are directly/indirectly working with projects including transnationality and mobility. European Minds together with 9 other EU partners has the opportunity to work with an financed Leonardo da Vinci project that aims to create better work placements in EU (<http://www.europemobility.eu>, <http://www.facebook.com/> EU mobility network)

One substantial activity within the project is to create an International Community for shared learning between international mobility coordinators. The International Community of Mobility Coordinators is an interactive group of people

with the common interest on transnational learning mobility. The aim is to stimulate the raise of quality and quantity of work placements in Europe by promoting interaction and cooperation among those who are responsible for mobility initiatives. The platform is open to VET, HE and informal and non formal education actors. Within this community you can find both new contacts / partners for exchange, learning on how to work with quality in mobility exchanges, possible sources of funding for mobility and much much more.

We would like to take this opportunity to invite you to be a part of the community and to share your experiences on working with European Mobility. It is very easy to join the community, just register directly on the website <http://www.europemobility.eu> and you will be a part of a vast and rapidly growing international community that shares substantial and important knowledge and experiences on mobility.

Partner search - EUROSTARS Project related to Traffic management

We are looking for a non-spanish partner (R&D-performing SME) to participate in the next EUROSTARS Call (Deadline April 4). In the present proposal, we aim to design and implement a new tool of traffic management in order to detect more relevant incidents and more frequent and dangerous violations of highway code. The partner sought should have one or more of the following profile or experience:

- 1) Design and innovation in traffic sensors (cameras, filters, etc.).
- 2) Using computer vision or other sensors for traffic control.
- 3) Innovation in management systems road maintenance.
- 4) Creation and design of tools for visualization and control traffic.

Interested organisations please send a description with your profile and expertise.

Call For Tender / Proposals / Applications / Fundings / Awards

Cultural Heritage JPI launches joint pilot call

The Cultural Heritage Joint Programming Initiative (JPI-JHEP) has opened a transnational joint pilot call for proposals for research projects in the area of cultural heritage. The deadline for applications is 5 April 2013. The priority research areas include: materials, technologies and procedures for the conservation of tangible cultural heritage; and use and re-use of buildings and landscapes, including the relationship between changes of use and public policy, including costs and added value (for example as a result of planning regulations and urban development).

Projects must have a maximum duration of 36 months, the overall call budget is €3 million and a consortium must consist of organisations based in at least 3 different JPI-JHEP participating countries.

European Nanoelectronics Initiative Advisory Council (ENIAC): Call 8 launched, budget of EUR 50.22 million

ENIAC is the Joint Technology Initiative (JTI) representing the main EU stakeholders of nanoelectronics industry. It aims at strengthening the cooperation in nanoelectronics, to increase the competitiveness of EU & associated partners in this field. This call focuses on projects dealing with technological R&D activities; in Technology Readiness Level terms this refers to levels 2 to 5 i.e. formulation of technology concepts, experimental proofs, validation in laboratory conditions.

A valorisation & deployment plan must be included in the Project Proposal. The call follows a 2-stage procedure. Deadline for Project Outlines: 23 May 2013. Deadline for Full Project Proposals: 12 September 2013.

Policy

European Commission President Barroso announces creation of a Science and Technology Advisory Council

On 27 February 2013, the President of the EC, José Manuel Barroso, has announced the creation of a Science & Technology Advisory Council. This informal advisory body held its first meeting that day in Brussels.

President Barroso said: "Science and innovation are key drivers for EU competitiveness, economic growth and the creation of new jobs. This Advisory Council will focus on science and technology related topics that are of cross-cutting nature, with a clear societal dimension. It will identify the issues of value where science, research & innovation can contribute to support future development in Europe".

Events

17th International Conference on System Theory, Control & Computing, ICSTCC, 11-13 Oct 2013, Sinaia, Romania

The main goal of the conference is to provide a multidisciplinary forum between researchers from industry, academia to discuss state-of-the-art topics in system theory, control & computing, to present recent research results, prospects for development in this evolving area. The ICSTCC conference, is technically co-sponsored by IEEE Control Systems Society, the papers will be indexed in IEEE Xplore.

Smart Cities Annual Conference 2013, 5-6 June 2013, Budapest

This year's Conference will be a unique occasion for cities, solutions providers to meet/discuss the future shape of the EU urban landscape. The programme of the Conference is rich and diversified: it alternates keynote speeches with workshops and networking sessions. The first day is fully devoted to discussing Key Innovations among the relevant stakeholders: technology providers on one side and cities as users on the other, with particular attention to matchmaking possibilities. The second day focuses instead on discussing achievements and developments of the Platform itself.

Workshop Exchange of best practice on implementation of innovation management within security organizations in Europe, 13 March 2013, Oslo, Norway

This event is organized in framework of the INSEC project www.insec-project.eu , co-financing by the EC / DG Research and Innovation and during the event Sectech Norway, 12-13 March <http://www.sectech.nu/no/en/index.asp>. The workshop will focus on exchange & promotion of best practices and are organised as an interactive event giving participants the opportunity for discussion and exchange of experience.

The INSEC project is striving to improve the Innovation & Research processes within security organisations, enabling to evaluate novel approaches, services, new technologies dedicated to the safety of citizens. The project focus on 2 areas:

- Development of a new internal innovation management model which will allow security organisations to better manage both the financial impacts and the added value of innovation projects.
- Development of an external innovation platform to promote networking between European security SMEs and public/private security organisations. This will increase the visibility of SMEs to the security organisations and hence diversify the range of services and technologies available to them.

The exhibition and the seminars are focused entirely on security technologies.

The International Symposium on Nuclear Energy (SIEN), 20-24 October 2013, Bucharest, Romania

SIEN is a biennial scientific and technical meeting in Romania having already a long tradition. SIEN is co-organized by the Romanian Nuclear Energy Association - AREN and the Romanian Atomic Forum - ROMATOM. The objective of the

symposium is to debate challenges and the future prospective of Nuclear Energy in the context of the last well known events in the world. All the experts and representatives of the main organizations and institutions involved in the development of nuclear projects are invited to attend SIEN 2013. This symposium is also open to research officers and students interested in the Issues of Nuclear Energy.

PCIM - International Exhibition & Conference on Power Electronics, Intelligent Motion, Renewable Energy and Energy Management, 14-16 May 2013, Nuremberg, Germany

PCIM (Power Conversion Intelligent Motion) is Europe's leading meeting-point for specialists in Power Electronics and its applications in Intelligent Motion, Renewable Energy and Energy Management. Get up-to-the-minute information on the newest trends and developments as well as state of the art solutions for your most challenging problems.

In parallel to the exhibition the most important user-oriented conference on power electronics will be held. It focusses on future issues, such as renewable energy, electro mobility and energy management. The comprehensive conference program with numerous oral and poster sessions as well as seminars and tutorials provides state-of-the-art application know-how on power electronics. Specialists from all over the world will report in first publications on their latest products and applications and will be available for technical discussions.

6th ISPIM Innovation Symposium – Innovation in the Asian Century, Melbourne, Australia, 8-11 December 2013

Organised by ISPIM, hosted by the Victorian Universities Innovation Management Network, the event will bring together around 250 innovation experts from 35 countries. The Symposium asks some very tough questions: How does this change in focus impact global business innovation & competitiveness? What types of innovation frameworks, models will maximise Asia's/the Pacific Region's potential? How can businesses, governments, educational institutions adapt to this change in focus? What are the prospects for Asia/the Pacific Region driving innovation globally? How sustainable is the 'Asian Century', what does it mean for businesses, governments, educational institutions, both inside/outside Asia.

Training on „Introduction to the IMP³rove Approach“, March 14-15, 2013, Berlin, Germany

Demand for better Innovation Management support for SMEs is continuously rising. With the IMP³rove Assessment – the European Approach to Innovation Management – you will gain insights into an effective approach to Innovation Management support for SMEs. This is an excellent opportunity to gain access to international benchmarks on Innovation Management and to an international network of professional IMP³rove Consultants.

For registration for the IMP³rove training please send an email to: improvecoreteam@atkearney.com.

More... IMP³rove calendar: <https://www.improve-innovation.eu/academy/education-programme/training-calendar/>.

High-level event on innovative public procurement on 21-22 March 2013, Berlin (Tiergarten), Germany

European conference “Demand-driven innovation through public procurement - *Pre-commercial Procurement & Public Procurement of Innovative Solutions: New Instruments for more efficient Public Services, Advantages for Industry/SMEs*“. The event will offer a platform to hear first-hand from the EC and Member States how they are supporting the implementation of Public Procurement of Innovative Solutions (PPI) and Pre-Commercial Procurement (PCP).

There will be the opportunity to learn directly from participants in innovation procurement programmes about the process involved, lessons learned, outcomes achieved. You will meet partners from Member States, public policy officials, procurement experts and other innovation procurement policy stakeholders as well as experts from industry and SMEs.

Information on currently open calls for PCP and PPI can be found on the following websites:

PCP: http://cordis.europa.eu/fp7/ict/pcp/calls_en.html

PPI: http://ec.europa.eu/enterprise/policies/innovation/policy/public-procurement/index_en.htm

INSMEAcademy, new Webinar-based training program, 27 March 2013

The webinar is based on topics concerning **Innovation, Creativity, Strategic Partnerships, Entrepreneurial Spirit**.

All webinars will be held at lunch time. Each session will have 60 minutes including a 10 minutes Questions&Answers Session. All participants have the possibility to take advantage of a free "Expert-talk"-Session, held during the following 2 weeks of the seminar to raise questions, find solutions, share good practices. Webinars are open to everybody, upon registration, on a fee basis. The first session of the **INSMEAcademy** will be held on the 27th of March 2013, from 1 pm to 2 pm Italian Time. The topic will be "**The social media based innovative services: the new value creation drivers**".

International programmes in EIE, "Bachelor in Networking" & "Master in Automation & Network", courses, exchanges, Grenoble

Remind you of 2 international programmes open in Grenoble, one at the bachelor level, one at the master level. These international programmes aim at emphasising in particular EU **exchanges** (ERASMUS). Under certain conditions, it is possible for **ERASMUS students to get a French diploma**, if they stay the complete academic year in Grenoble.

These are the two programmes, with full recognition in the French accreditation system:

- 1) Last year of a Professional Bachelor in "Networks & Telecommunications specializing in Wireless networks, security" (the 5th & 6th semesters of a 3-year Bachelor programme).

This programme has been open in 2007 (it will be the 7th academic year in 2013-2014).

- 2) Last year of a Master in "Systems, Control and Information Technologies" *(2 options offered) (is a two-semester programme (Master 2 in the French system), for students who passed previously

- 180 ECTS for the students in an exchange programme (validation of one semester in their home institution)

- 240 ECTS for students wishing to validate the Master 2 level.

This programme has been open in 2008 (it will be the 6th academic year in 2013-2014).

If your students come as Erasmus students (we can sign an agreement for that), you can hopefully recognise the courses. Because this is the last year of a level (Bachelor in the first case, Master in the second), under certain conditions, the ERASMUS students can also get the French diploma, together with students who register normally for the courses. We can have staff-ERASMUS exchanges if you are interested to come to give some courses in Alp mountains.

Seminar Smart Specialisation Strategies: Ex-Ante Conditionality, 2014-2020 Period, 11-12 April 2013, Berlin

- Understand the concepts behind Smart Specialisation and its future developments
- Improve your practical skills to design or update your Research & Innovation Strategy for your Operational Programme
- In a workshop, learn how to implement cooperative frameworks and aligned interests for all stakeholders
- Boost your region's competitiveness by identifying its advantages, strengths and priorities
- Get a hands-on perspective with lessons learnt and case studies from practitioners around Europe

Course 'Quantitative Risk Assessment & Advanced Applications', Stuttgart, Germany, April 8-12, 2013

The course presents an introduction to Quantitative Risk Analysis, thus illustrating the necessary steps for the calculation of risk indexes. Practical approach to frequency calculation and consequence assessment, including vulnerability models, will be discussed. A specific focus on domino effect, accidents triggered by Natural-Technological (Na-Tech) events will be presented. The goal of the course is to give an introduction to Quantitative Risk Assessment, to introduce the participants to the analysis of risks originated outside the process boundary, i.e. due to external events.
