Technology Transfer and Innovation

Events in technology transfer and innovation field

Enterprise Europe Network carries out a variety of events to promote their activities to companies and organisations at regional, national or European level. The events provide you the opportunity to meet potential cooperation partners during pre-arranged face-to-face meetings, to present your business or technology offers.

Do you have technology profiles in the fields? Please contact office@ipacv.ro to support you.

Technology transfer services / All reasonable models of co-operation will be considered

You are an inventor, do you have technology to transfer, do you have new products, technology based on innovations to offer; do you need news technologies, do you need technical assistance in technology transfer...

Please **contact** IPA CIFATT Craiova, e_mail: office@ipacv.ro ; web site: www.ipacv.ro.

Clusters

Call for tenders European Cluster Observatory II, Deadline: 16 August 2013

The subject of the contract is to launch the second generation of the European Cluster Observatory aimed at supporting efforts to promote the development of more world-class clusters in EU, notably with a view to fostering competitiveness and entrepreneurship in emerging industries and facilitating SMEs' access to clusters and their internationalisation activities through clusters. The main task of the European Cluster Observatory is to offer statistical analysis, mapping tools and policy advice towards the design of more evidence-based cluster policy in EU.

Please note that since 1 January 2012, all tendering documents relating to DG Enterprise are published through a Commission-wide unique platform called "eTendering". Consequently, the tendering documents are not published here.

The documents will become visible and downloadable once the contract notice is published on TED.

More... <https://etendering.ted.europa.eu/cft/cft-display.html?cftId=301>

Offering for SMEs to research on state of the art ICT testbed facilities & infrastructure - FUSION initiative

FUSION aims to bring SMEs to networking test facilities to test out their applications, prolonging the life of EU funded test facilities. The benefits to SMEs are: reduce their testing costs by using freely available testing environments, validate their developing products to satisfy possible venture interests, create new business opportunities via increased market viability, possibility of getting funded via EU open calls for testing of innovative products on available test facilities

The FUSION initiative has developed a portal website to broker discussions between interested SMEs, the test facilities owners. Please sign up for our newsletters and other upcoming webinars, events to learn more on our portal website.

Intellectual Property ; Standards

How to maximise your profits with IP

Is it a series of **free** online webinars to help raise awareness of Intellectual Property (IP), with the aim of showing you the importance of IP to your business and how you can benefit from it. IP is important to any business and all businesses will own some form of IP.

Whether it is the name above the door, the layout of your website or a new product you have invented, IP can help you protect it and maximise its value. Each month we will give you an overview of maximising your profits with IP. The event will focus on the [basics of licensing](#), how to make your IP bring [more money to your business](#).

We will also give tips on how to protect your IP, as well as warn you of some of the pitfalls.

Exploiting new international trade and technology R&D opportunities

Internationally active SME's stand a better chance of weathering today's challenging trading conditions, but exploiting overseas trading, R&D opportunities is easier said than done. Enterprise Europe Network Wales has pulled together a panel of experts who can unpick some of the obstacles SMEs may encounter.

This is aimed at SME's interested in exploring new international trade & technology research & development opportunities. The breakfast seminar event is suitable for export/sales/commercial managers or directors with responsibility for developing overseas customer markets; importing/exporting goods; R&D, product development; technology exploitation & developing strategic partnership/relationships with overseas organisations.

Research

Science and technology statistics at regional level

The article presents statistical information that illustrates regional developments for science & technology indicators within the EU. The domains covered are research and development (R & D), the number of researchers, human resources in science and technology (HRST), employment in high technology sectors and patent applications.

More... http://epp.eurostat.ec.europa.eu/statistics_explained/index.php/Science_and_technology_statistics_at_regional_level

How FP7 R2R-CIGS aims to up-scale the manufacture of flexible, thin film CIGS solar modules to a roll-to-roll pilot line

Innovation and Entrepreneurship

A case study into how user experience is key in successful innovation and marketing

If ever there was a market for for one of the hottest/coolest (excuse the pun) technology propositions the [Nest thermostat](#) it is the UK. One minute it's sunny and warm but the next (and actually most of the time) it's cloudy and cold. So surely us Brits are target market for better managing the temperature of their home. How much cooler does this Nest thermostat look than the drab old white or grey plastic thermostat that you have hidden somewhere in your house?

More... [Nest-technology-marketing-that-is-hot-and-cold](#)

Science and technology statistics at regional level

You can find statistical information that illustrates regional developments for science & technology indicators within the EU. The domains covered are R & D, the number of researchers, human resources in science & technology (HRST), employment in high technology sectors, patent applications.

The EU-27 had an [R & D intensity](#) of 2.03 % in 2011, in other words, [expenditure on R & D](#) was equivalent to 2.03 % of gross domestic product (GDP). In the period between 2001 and 2007 there was little change in the EU-27's R & D intensity, as the level of expenditure in relation to GDP lay within a relatively restricted range from a low of 1.82 % to a

high of 1.88 %. There followed successive increases, as R & D intensity rose from 1.85 % in 2007 to 1.92 % in 2008 and by a further 0.1 percentage points in 2009 (to reach 2.02 %). Thereafter, there was another period of relatively stability as the EU-27's R & D intensity was 2.01 % in 2010 and 2.03 % in 2011.

More... http://epp.eurostat.ec.europa.eu/statistics_explained/index.php/Science_and_technology_statistics_at_regional_level

Innovating Human Capital Management?

At the mention of the word "innovation" your mind might conjure up images of lab-coated geniuses navigating high-tech laboratories, designing the latest smart phone or computer tablet. While most leaders understand the importance of innovation, many acknowledge that their organizations are not effective at managing it.

Although product development & technology are the most synonymous connotations, innovation can have a much broader reach across an organization, even impacting business performance through people practices.

Yes—"people practices"—you know, those practices organizational leaders develop, implement, track to ensure that their people (or human capital) are positively impacting their businesses.

We are interested in a cooperation concerning biological properties of polyphenols

We have some preliminary results concerning the influence of polyphenols in the vegetal, animal and microbiological systems. We would like to cooperate to obtain the information about the mechanism at cellular level.

Contact: Valentin Popa, Professor at Technical University of Iasi, Romania, vipopa15dece@yahoo.com

Looking for a potential investor in patents and inventions

We are a SME with the main object of activity of research & development. We have participated in many national research projects and also have been awarded with a consistent number of national & international awards. Recently, we have won the gold & silver medal in the World Inventions exhibition Geneva 2013 for the following inventions: " Portable device for real time monitoring of epileptic seizures"- gold and " Equipment for the cryopreservation of stem cells"- silver.

Also we have won another 3 silver medals in the past years in Geneva & Brussels international exhibitions and in 2012 at the Nunberg International exhibition Iran & Russia's jury prizes. At the international exhibition Inventika we got 4 medals during the past years. All of our inventions have been patented.

We have also manufactured the only tissue banks from Romania, including skin, bone, heart grafts, sperm, cornea and also equipments for the hyperthermic intra-abdominal administration of cytostatics.

We are looking for a potential investor in our patents and inventions so they can get from the current stage of prototype / small line production to commercial production.

Contact: Supeanu Alexandru, Criomedical Technology SME, t: +40761684836 / +40724088001, criomedical@gmail.com

Re Energy Engineering, Sofia, Bulgaria are looking for partnership

Re Energy Engineering Ltd is specialized in design and installation of geothermal installations for heating and cooling of buildings, which save up to 75% of the energy cost. We use up-to-date specialized drilling equipment and equipment needed to do the Geothermal response test (GRT). We are looking for:

- co-operation with local companies specialized in the design of installations for heating and cooling of buildings.

- investors and building companies operating on building sites or interested in geothermal installations.
- trade partners for our thermocementRe Energy Therm.

For more information look at: <http://www.reenergy-bg.com/therm/index.html>.

Policy

Genomica: OECD report A Good Life in Old Age? Monitoring and improving quality in long-term care

A new OECD report sponsored by the European Commission has been released two days ago during the conference on Preventing abuse, neglect older persons in EU, event held to mark the World Elder Abuse Awareness Day.

The report: [A Good Life in Old Age? Monitoring & improving quality in long-term care](#) underlines the importance of the high quality care services in the context of the global ageing population. Examples given from different EU countries & the USA have showed that the quality assurance scheme vary greatly. The document highlights aspects as the necessity of achieving quality of the long term, the importance of the targeted policies. Effectiveness, care safety, patient centredness, responsiveness, care co-ordination are elements as generally accepted as critical to quality care.

EU-funded Course 'Chinese for Europeans' available for free

The 'Chinese for Europeans' language course contains five modules dedicated to different target groups and is available in 23 official EU languages. To take an advantage of all modules of the Chinese language learning course, simply set up an account at www.chinese4.eu. The website also offers useful information about cultural differences between the western and eastern traditions and practical advice on behavior during a trip to China.
