Technology Transfer and Innovation

Events in technology transfer and innovation field

Enterprise Europe Network carries out a variety of events to promote their activities to companies and organisations at regional, national or European level. The events provide you the opportunity to meet potential cooperation partners during pre-arranged face-to-face meetings, to present your business or technology offers.

Do you have technology profiles in the fields? Please contact office@ipacv.ro to support you.

Research

EU's Horizon 2020 should pay researchers in Eastern Europe the same salaries as in Western Europe?

The worrying brain drain from Eastern Europe and poor participation of scientists from the region in the EU's research projects could be reversed if the scientists were paid salaries equal to those of their Western colleagues, [a paper](#) argues. Such a move would come at a minimal cost to the EU's research budget but would level the playing field, allowing the East to retain and even attract talent, says the paper in *Journal of Health Services Research & Policy*.

More... [EUs-Horizon-2020-should-pay-researchers-in-Eastern-Europe-the-same-salaries-as-in-Western-Europe?](#)

10th Progress Report on SMEs participation in the 7th R&D Framework Programme

The decision establishing FP7 has set a target for 15% of EU funding under the Cooperation Programme to go to SMEs. The report is the tenth of a series of reports whose primary aim is to monitor the implementation of the above mentioned target. In addition to reporting on the 15% target of the Cooperation Programme, the report provides detailed data on SME participation across FP7.

Innovation, Competitiveness and Entrepreneurship

A real momentum in innovation is needed for greater organic growth

Innovation is increasingly moving beyond the previous boundaries of just being left to each organizations scientists or marketing departments, those days are seemingly long gone. Today and in the future, innovation is about open, inclusive, full of exploration and harmonization to extract the best results.

We seem to have really grasped and recognized the combination-effect that comes from the myriad of different linkages that is propelling innovation activity and bringing increasing confidence within the boardroom.

According to a recent PwC report, optimism has dramatically been raised around innovation, so much so the vast majority within the survey of 1,757 c-suite or executives respondents believe their aggressive growth plans will be driven by organic growth (93%) and not by previous means of M&A activity. They are talking more radical and breakthrough innovation. BCG in its 2013 report on [most innovative companies](#) is equally far more bullish on innovation.

More... [Beyond-the-previous-boundaries-of-innovation](#)

Can Innovation be the Key Driver for Europe's Competitiveness?

Horizon 2020 will see a number of firsts for R&D in Europe. The new SME instrument will have an enlarged budget thanks to the Members of the European Parliament. In addition, the Marie Curie Actions with their budget increase of 21% compared to the FP7's People programme, will combat "the Brain Drain from Europe".

More... <http://www.sciencebusiness.net/news/76278/Horizon-2020-moves-one-step-closer>

First round of calls is going to take place on 11 December 2013. So, be ready for Horizon 2020 by joining subgroups (if you are not already done so) related to each research area, and posting and responding to partner search requests:

10 Must-Haves to Include in Your Innovation Strategy

Over the past two years I've worked with a number of organisations to help them develop their strategy for innovation. In that time, I haven't come across many (any), organisations that have already have strategy for innovation.

The most I see is "let's teach our staff creativity" , and "let's start a suggestion box". One thing I know for certain is that without a deliberate strategy for innovation, it quickly gets subsumed by business as usual. In the interests of helping clients have a great strategy I'd like to hear from you: What should an Innovation Strategy include?

Call For Tender / Proposals / Applications / Fundings / Awards

CIP - EIP European Mobile and Mobility Industries Alliance 2013. Deadline: 05 November 2013

Budget: €2 375 000. **Specific Programme(s):** Entrepreneurship and Innovation Programme (EIP)

The main objective is to develop large-scale demonstrators of Copernicus & the EU GNSS-based services. The concept of large-scale demonstrators is a new approach for stimulating innovation. It provides regional, local authorities, with a tool to better link all public, private actors, notably industry, knowledge-based service providers, research institutions, regulators, users/citizens to share knowledge, contribute practical experience, articulate their needs & competences. It offers a clear context, the appropriate incentives for successfully developing, testing, implementing new approaches in addressing specific challenges & problems. At the centre of large-scale demonstrators lies a staged approach that starts with the specific need or a vision for the future that is of importance to the area. It then works back from this challenge or policy objective to the potential technical and service innovation solutions and the corresponding support required.

FP7 ICT Call on Future Internet Public-Private-Partnership (FI-PPP). Deadline: 10 December 2013

The objective of this third phase of the FI-PPP is (i) to provide and run a stable infrastructure for the large scale trials, expand the core platform, the use case specific functionalities and their demand-driven instantiations, and (ii) to involve through open calls SMEs and web-entrepreneurs as developers of highly innovative, infrastructure based, data-rich services and applications, building on, and extending, the large scale trials and the core platform functionalities.

The third phase is an integral part of the FI-PPP and capitalises on the investments and developments of phase one and two. The third phase of the FI-PPP ensures that technological developments and trials taking place in phases one and two will evolve into seed-type activities generating actual take-up of innovative Internet services and applications.

The FI-PPP should also be an accelerator for regional smart growth. Therefore this last phase of the FI-PPP is expected to connect and establish close synergies with regional developments and policies. Indicative budget: EUR 130.000.000

The world will continue to depend on coal

According to a report released by the International Energy Agency, coal will be the most used fuel worldwide by 2030 as developing countries are powering the rapidly increasing cities, rural areas where billions of people have had no to power. Coal and gas-fired power plants are necessary as a connection to maintain secure the electricity supply while countries are building up their capacity for producing electricity from the wind, sun, biomass. The world will handle the shift away from fossil fuels to renewable energy on condition that more fossil fuel power stations are built.
