Expertise offered and what I would like to do	FutureWater is a Spanish SME which provides science-based and applied solutions for water and ecosystem management throughout the world. Our team has strong analytical and modelling expertise for the integration and processing of Earth Observation data and field measurements into eco- and agro-hydrological models and the development of decision support tools. In different parts of the world, FutureWater assesses the vulnerability of the water-dependent systems to future scenarios of climate and land use change, and provides		

	<p>guidance and practical recommendations for the adoption of the best management strategies and measures.</p> <p>FutureWater aims to be an active partner in a project for the call SC5-16-2014 <i>Making Earth Observation and Monitoring Data usable for ecosystem modelling and services</i>.
